

CONFIDENTIAL

MEMORANDUM FOR: Deputy Director of Security

SUBJECT : OSI Comment on Draft DCID 11/2 (New Series)

**REFERENCE : Revision of DCID 11/2 - Control of Dissemination
and Use of Intelligence Information**

1. As was requested, OSI has reviewed the referenced draft.

2. a. We find that the limitations on the use of uncontrolled classified information in digests (paragraph 7) would seriously deter the publication and distribution of the Scientific Intelligence Digest, because the draft prohibits use of classified information from other than NOFORN documents even for domestic use until cleared by the originators. This would mean that virtually all SID items would have to be released by the originators prior to the SID publication.

b. OSI recommends that the draft be modified to permit use of uncontrolled classified information in digests in accordance with standard security regulations and established releasing agreements between this Office and other agencies. OSI publishes a **SECRET/NOFORN** version which by specially approved arrangements is distributed outside the intelligence community, and a sanitized version marked **SECRET/NOFORN** [REDACTED]

3. OSI frequently finds it possible to issue **UNCLASSIFIED** publications prepared from intelligence and intelligence information submitted by outside contractors but because of copyright obligations, marks them **FOR OFFICIAL USE ONLY**. Since this dissemination control has been omitted in the draft directive, but is a category of intelligence released to foreign nationals, we suggest that paragraph 11 of the draft directive, where **OFFICIAL USE ONLY** material is partially described, be expanded to include definitions for the use of intelligence so marked.

CONFIDENTIAL

CONFIDENTIAL

3. Except for the above questions, OSI believes that the draft directive will become a good working basis for the entire intelligence community, presupposing however that sources previously marked **NOFORN** on a standard basis will be changed to agree with the provisions of the new directive.
